CURRENT STATE OF MEDIA EDUCATION IN RUSSIA IN THE CONTEXT OF GLOBAL TRENDS

Materials of the IV International Scientific Conference • October 14, 2022 • Taganrog – Yekaterinburg 2022

Welcome Address

Dear participants of the IV International Scientific Conference!

Today, the set of issues related to the implementation of media education into socio-cultural processes is becoming an increasingly demanded "topic" on the current agenda of societal development. This is primarily due to the active digitalization of education and the penetration of media into all spheres of life of modern human beings; it is obvious that the influence of the media sphere extends to the formation of cognitive and value priorities as the basis of the meaningful worldview model.

The conference brought together pedagogical, psychological, cultural, political, philosophical, and sociological studies by scientists from various regions of Russia, Italy, Belarus, Uzbekistan, Kazakhstan, China, and other countries. We wish all our partners and colleagues interesting discoveries and meaningful discussions!

Andrey Yuryevich Goloborodko, Director of the Taganrog Institute named after A. P. Chekhov (branch) of FSBEI HE "RSUE (RINH)", Doctor of Political Sciences, Professor, Deputy of the City Duma of Taganrog.
